Y.Deeksha (R170571)

Under the guidance of

Mr. B.Linga Murthy

Assistant Professor, IIIT RK Valley, RGUKT-AP

In fulfilment for the award of the degree of

Bachelor of Technology

In

Computer Science Engineering

Rajiv Gandhi University of Knowledge Technologies

(Catering the Educational Needs of Gifted Rural Youth of A.P)

R.K Valley , Y.S.R Kadapa(Dist)-516330

Acknowledgement

Words are only representation of my sincere gratitude that we have towards actions and their

inherent associations. As a matter of fact, without cooperation, no thought could be coined into real

action. Consistent motivation, invaluable support throughout any project is an issue that cannot be quantitatively measured. The acknowledgement is only a fraction of regards towards their gestures.

I extend my sincere and heartfelt thanks to our esteemed **guide, Mr B.Linga Murthy** and for his exemplary guidance, monitoring and constant encouragement throughout the course at crucial junctures and for showing us the right way.

I would like to extend thanks to our respected **Head of IT Infra, Mr. Satyanandaram K and Software Engineer, Mr. Lingamurthy B** for allowing us to use the facilities available. I would like to thank other faculty members also

Last but not the least, I would like to thank my friends and family for the support and encouragement they have given us during the course of our work.

Rajiv Gandhi University of Knowledge Technologies

(Catering The Educational Needs of the Gifted Rural Youth of A.P)

IIIT, R.K Valley, YSR Kadapa (Dist)- 516330.

CERTIFICATE

Certified that the mini project report on, “**ONLINE OUTPASS SYSTEM**“ in the domain **FULL STACK DEVELOPMENT** is bonafide work of D.Praneetha (R170568), M.Sravani(R170569),Y.Deeksha (R170571) 3rd Year B.Tech, Computer Science Engineering in R.K Valley Campus of Rajiv Gandhi University of Knowledge Technologies (RGUKT), Andhra Pradesh carried out during 20 April 2022 to 20 August 2022.

Faculty In-charge

**Head of the
Department**

Panel Members:

1.T.Sandeep Kumar Reddy

2.K.Vinod Kumar

3.Udaya Sree

Abstract

Out-pass is a permission that is given to students to go out of hostel mainly in Institutions. Currently many hostels are following manual work i.e., Student need to visit the Warden/Care taker office by in person. Our project is to reduce that manual work and paper usage by providing an online environment where Students can apply for out-pass and Wardens and Care takers can also easily accept or reject Students out-pass through this portal. The Out-passes history will be stored in database. So, the institute can check that details when they required.

Scenario:

Out-pass system for hostels where students get to take permission of Warden/care taker just by filling up a simple form.

The student login's and fills the out-pass form and waits for the reply from the authorities(caretaker/warden). By default, the status of the out-pass is "pending". The Warden gets all the Out-pass Applications from students and have the power whether to accept or reject the out-pass. Warden/care taker can take further steps of verification and decides whether to approve or reject the Out-pass. If accepted the status is "Approved" or if rejected the status is "rejected" and the status displayed on the student's check-status page. Warden can also able to see the all approved and rejected out-passes details.

Requirements:

- Two characters
 - Student
 - Warden
- Individual Login page for actors
- Student must have following functional requirements
 - **Home Page** – basic details of particular student should be shown.
 - **Apply** – Students can fill the application form for the out-pass. Here Student must fill the basic details like Guardian Name, Guardian Ph. No., Student Ph. No., From Date, To Date, Reason for Out-pass.
 - **Check Status** – Students can check the status of his/her out-passes.
 - **Reset Password**
 - **Logout**
 - Warden must have following functional requirements
 - **Home** – Basic details of warden should be shown

➤ **Pending List** - Details of all out-passes of status as 'pending' should be shown.

➤ **Accepted List** - Details of all out-passes of status as 'approved' should be shown.

➤ **Rejected List** - Details of all out-passes of status as 'rejected' should be shown.

➤ **Reset Password**

➤ **Logout**

Online Out-pass System (OOS)

1. Introduction

1.1. Purpose: The Online Out-pass System (OOS) for to reduce the hassle the students have to go through while getting permission from respective authorities (warden/care taker) before leaving the hostel campus and reducing the wastage of time. This application helps in eradicating the use of paper, hence saving the environment and trees.

1.2. Scope: This system allows the warden/care taker to maintain the out-pass records and accept or reject the out-pass applied by the student. And also allows the student to apply/register for the out-pass easily.

1.3. Definitions:

- OOS- Online Out-pass System
- SRS- Software Requirement Specification
- Pending – By default, the status of Out-pass is ‘Pending’ (And student cannot able to go out).
- Approved – If Warden/care taker accept the out-pass, then the status of the out-pass is ‘Approved’ (and student can able to go out).
- Rejected - If Warden/care taker reject the out-pass, then the status of the out-pass is ‘Rejected’ (and student cannot able to go out).

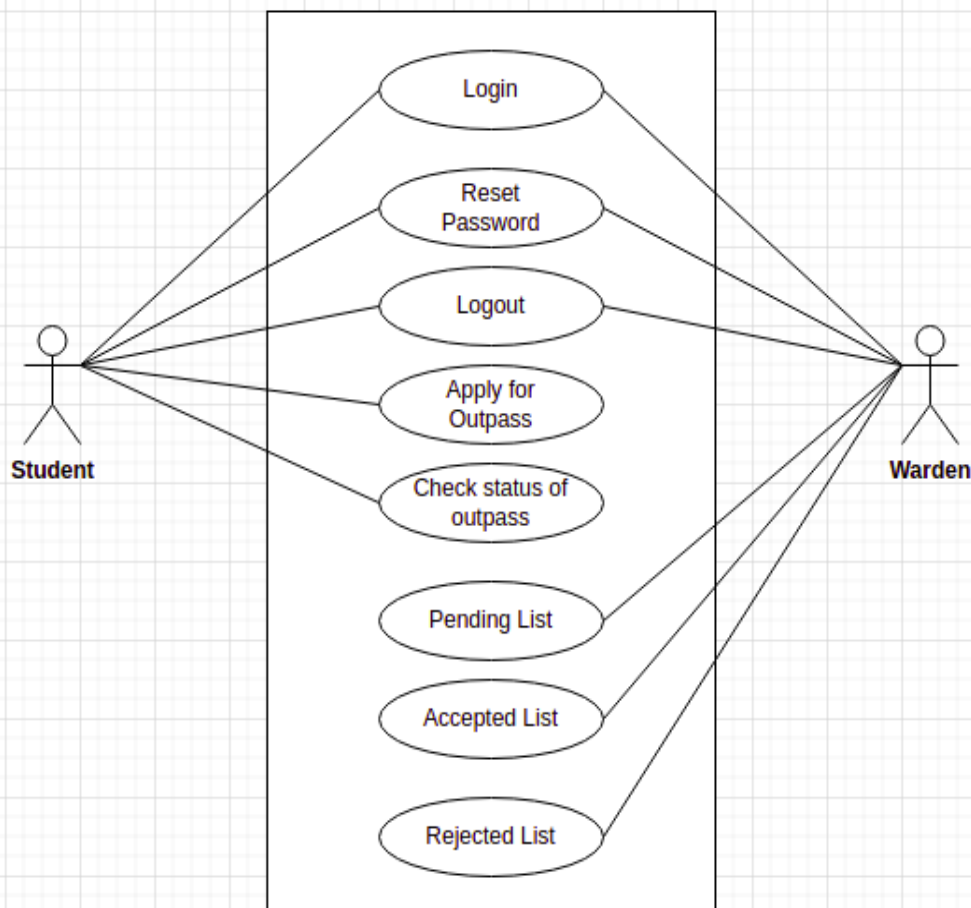

2. Overall Description:

Out-Pass system for hostels where students get to take permission of Warden/care taker just by filling up a simple form.

The student login's and fills the out-pass form and waits for the reply from the authorities(caretaker/warden). By default, the status of the out-pass is "pending". The Warden gets all the Out-pass Applications from students and have the power whether to accept or reject the out-pass. Warden/care taker can take further steps of verification and decides whether to approve or reject the Out-pass. If accepted the status is "Approved" or if rejected the status is "rejected" and the status displayed on the student's view-status page. Warden can also able to see the all approved and rejected out-pass details.

2.1. Product Perspective: This product aimed toward a hostel where to reduce the hassle the students, have to go through while getting permission from respective authorities (warden/care taker) before leaving the hostel campus.

2.2. Product Functions: OSS should support this use case

2.3. **User Characteristics:** User should be familiar with the terms like login, apply, check status, pending list, accepted list, rejected list etc.

2.4. **Principle Actors:**
2 Principle Actors are Student and warden.

3. Specific Requirements:

3.1. **Functional Requirements:** This section provides requirement overview of the system. Various functional modules that can be implemented by the system will be -

- **Login:** Student can login with their credentials (user id: id number and by default password is 10 th class hall ticket number)

Warden can login with their credentials (credentials will be

given by chief warden that are directly enter in database by chief warden).

- **Home:** In home page the details like name, student Id/ Employee Id, gender, email Id, designation of the user (student / warden) will show.
- **Apply:** This is for Students where they can fill the application form for the out-pass. Here Student must fill the basic details like Guardian Name, Guardian Ph. No., Student Ph. No., From Date, To Date, Reason for Out-pass.
- **Check Status:** This is for the students where they can check the status of the out pass.
- **Pending List:** This is page where the warden checks the all registration details and here warden can accept or reject the application for by clicking on respective buttons.
- **Accepted List:** This is the page where warden can see the details of all approved out-passes.
- **Rejected List:** This is the page where warden can see the details of all rejected out-passes. If warden rejected the out-pass by mistake, there is an option to accept that type of out-pass on rejected list page by clicking on 'Accept' button.
- **Reset Password:** Student and warden can change the password by entering the current password and new password
- **Logout:** Student and warden can able to logout. It will Redirected to Login page.

3.2. Non-Functional Requirements:

Following Non-Functional Requirements will be there in the insurance to the internet:

- Secure access to Student's and Warden confidential data.
- 24X7 availability.
- Better component design to get better performance at peak time.
- Flexible service-based architecture will be highly desirable for future extension.

Non-Functional Requirements define system properties and constraints. Various other Non-Functional Requirements are:

- Security
- Maintainability
- Portability
- Compatibility

3.3. Technical Issues: This system will work on client-server architecture. It will require an internet server and which will be able to run PHP application. The system should support some commonly used browser such as Mozilla Firefox, chrome, IE etc.

4. Software Interface:

4.1. Operating System: Linux/Windows.

4.2. Browser: Mozilla Firefox/chrome/IE.

5. Hardware Interface: Hardware requirements for insurance on internet will be same for both parties which are as follows:

Processor: Dual Core

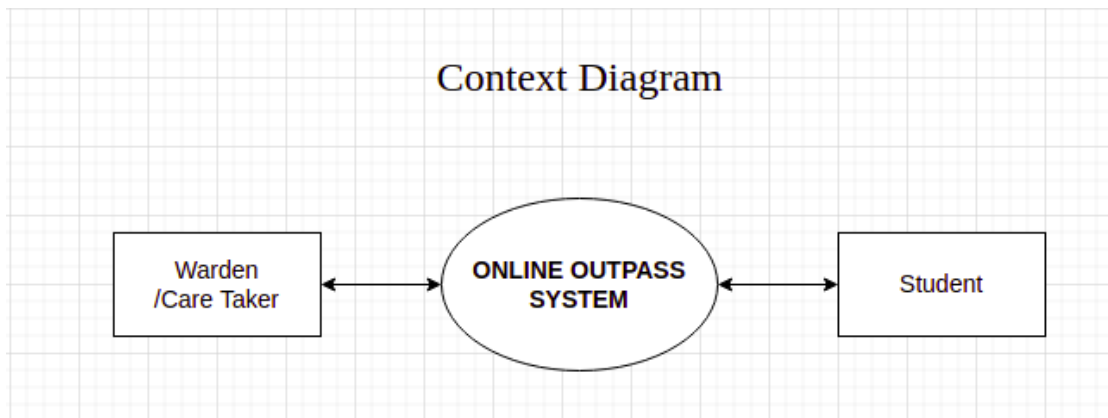

RAM: 2 GB

Hard Disk: 100GB

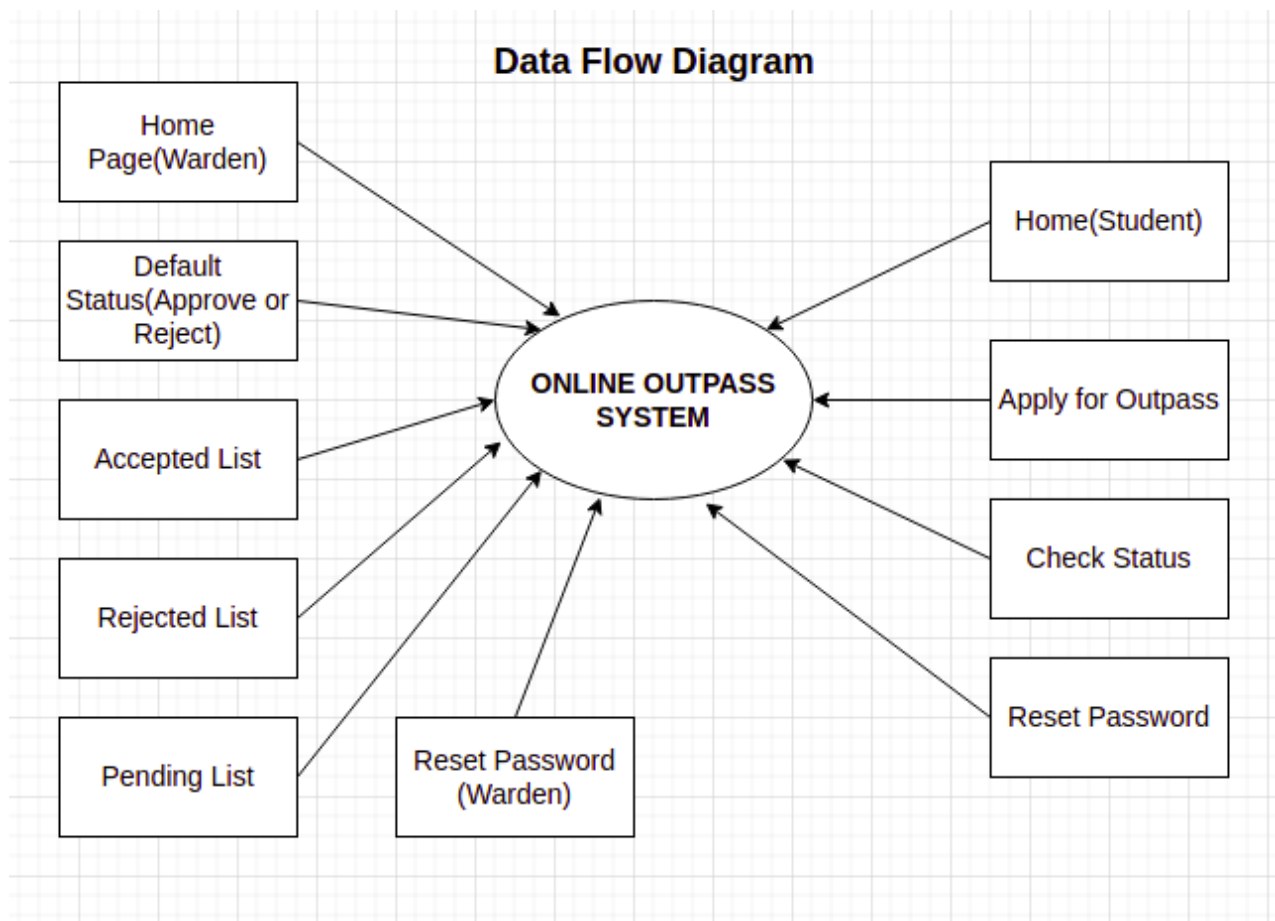

NIC (Network Internet Card): For each party

6. System Design:

CONCLUSION

This application thus ensures maximum security and removes all the manual work involved in hostel management activities and eases the monitoring student moments staying in hostel.

- It provides a friendly user interface .
- It gives appropriate access to the authorized users .
- It effectively overcomes the delay in communications.
- It provides easy maintainance of student data.
